

**The Doctoral School of Education at the University of Szeged, and
the Educational and Psychological Committee of the Hungarian
Academy of Sciences in Szeged**

cordially invite you to a public session on the topic of

REWARDS AND COMPETITION.

Guest Speakers:

Prof. SUZANNE HIDI
Professor
University of Toronto
Department of Educational
Psychology and Human Development

Prof. MÁRTA FÜLÖP
Scientific Advisor and Professor
HUN-REN Institute of Cognitive Neuroscience
and Psychology and Károli Gáspár University
of the Reformed Church

Rewards and competition that is integrally related to rewards have been perhaps one of the most contentious issues in educational and social psychology. A Special, Invited Issue of the Journal Learning and Instruction that is currently being finalized focuses on theoretical and empirical research that goes beyond a framework of dichotomous models that have characterized previous work in the area. Both of the talks will consider recent publications that corroborate the importance of these topics.

Prof. Hidi will discuss psychological and neuroscientific research that focused on rewards, discussing the methods used and diverse conclusions reached, and point to the need for a more integrative approach.

Title: The role of reward in human functioning: Revisited

Prof. Fülöp will discuss the „myth” of the school competitive climate.

Title: School competitive climate: Revisited

DATE: TUESDAY SEPTEMBER 17, 2024

TIME: 15:00 CEST

**Venue Address: 7, Somogyi Street, Szeged, H-6720 (Building of the Szeged
Committee of the Hungarian Academy of Sciences).**
